

Eric and Amalia,

As you prepare the final draft, we offer a few comments on the proposed changes to CCR Section 5141.1, Protection from Wildfire Smoke dated May 21, 2019.

- 1) It seems there is a typo in Appendix B (4) which states, "...and the current AQI for PM2.5 at the worksite is 150 or more." It should read "is greater than 150" or "151 or more."
- 2) To promote greater compliance, do not make the required information in Appendix B overly complex. Please consider removing the fill-in-the-blank sections and condense the required information so that if an employer follows Appendix B, then they are in compliance.
- 3) The "shave facial hair" note in the Appendix B picture seems to contradict f(4)(A).

Thank you,

Cindy
